

BioTrust[®]

Finger or Face Computer Logon

Cogent's BioTrust[®] biometric logon software is the industry's fastest and easiest secure Windows[®] logon replacement software available. Your face or fingerprint replaces the traditional username and password logon. Just sit down in front of your computer or swipe your finger across the fingerprint sensor and BioTrust will do the rest. Lighting conditions, such as side lighting, backlit areas, low ambient lighting, or lighting from the LCD screen itself are not an issue with Cogent's advanced facial matching algorithm. All you need is a web camera and/or a fingerprint sensor.

The BioTrust console easily allows users to customize security level settings, enroll facial/fingerprint images, and manage Web SSO (Single Sign-On) subscriptions. Enrollment is a breeze with BioTrust's intuitive enrollment wizard: visual cues and videos guide you through the enrollment process. Your computer is biometrically secured in a matter of minutes!

BioTrust's automatic Web SSO functions as a password manager for website logons. Whenever you navigate to a secured Web site - such as Web mail, social networking sites, online banking - BioTrust automatically captures the logon information while keeping you in full control. The Dashboard with QuickLaunch allows quick and easy access to Web sites that have been enrolled in the Web SSO with one click, all in one convenient location.

BioTrust is available in three configurations to meet your individual security needs: fingerprint login, facial login, and fingerprint or facial login.

Available Configurations

Fingerprint only
Face only
Fingerprint or Face

Supported Operating Systems

Windows® XP 32
Windows® Vista 32/64
Windows® 7 32/64

Supported Browsers

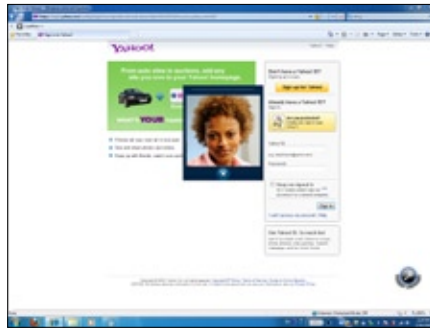

Microsoft® Internet Explorer® 7 or higher
